# About Us

**Medica-Group** is a company with over 25 years of experience in the sale of dietary supplements and cosmetics. Since 1999, we have been providing top-quality products that meet both Polish and EU standards.

We stand out due to our unique formulations and the highest concentrations of raw materials, making our products exceptional. We offer White Label services, ensuring comprehensive contract manufacturing for both large and small companies. Thanks to our commitment to quality and innovation, our products are recognized as some of the best on the market.

# Contract Production of Dietary Supplements

CONTRACT MANUFACTURING IS A COMPLEX PROCESS CONSISTING OF MANY STAGES. WITH THE EXPERIENCE AND SUPPORT OF OUR TEAM, YOU WILL NAVIGATE THROUGH THEM EFFORTLESSLY. SEE HOW WORKING WITH US LOOKS STEP BY STEP!

## FORMULATION

Based on your requirements and vision, we will develop an appropriate formulation. At this stage, we jointly determine the raw material composition and the characteristics of the final product. You can also provide us with your own formulation according to your guidelines. With our extensive supplier base, we will effectively tailor the dietary supplement to your vision!

## VERIFICATION

With a test-ready sample, we assess its quality. If the product is approved, we create a reference sample and provide it to you along with a cost estimate. At this stage, we begin laboratory tests to determine production parameters and start manufacturing the first batch. We also check the product's compatibility with the packaging to ensure the best experience and functionality.

# Contract Production of Dietary Supplements

---

## **REGISTRATION**

Before being introduced to the market, dietary supplements require registration with the Chief Sanitary Inspectorate. This involves completing the necessary documentation. If you need support, we are happy to assist you throughout this process.

## **PACKAGING AND LABELING**

After packaging the products into individual units, we label them, giving them the final look consistent with your brand. If you need assistance with branding and designing packaging with mandatory statements compliant with EU and national regulations, you can count on our team's support.

## **BULK PACKAGING**

The final step is packing the products into bulk packages to facilitate storage in the warehouse and distribution to business partners. Each bulk package has a logistics label tailored to the type of distribution required by our clients.

# Hard Capsules

NO SMELL

NO FLAVOUR

DIFFERENT  
COLORS

CONVENIENT  
FORM OF  
APPLICATION

**Encapsulation** is an effective method of enclosing the active substance inside the shell. Unlike tableting, we can put only active substances in the capsule, without any additives. The capsule shell can be made of gelatin (beef, pork or fish) or vegan cellulose. Capsules may have different sizes and colors, depending on the type of product and the intermediates used. Production takes place on a modern, fully automatic production line from renowned pharmaceutical suppliers. The line is equipped with systems for controlling the capsule filling, dust removal and polishing processes.

SUBSTANCES

**Tablets** are one of the most popular forms of dosing medications and dietary supplements. We will help you create a formulation and guide you through the entire tablet production process to meet your expectations and the needs of your customers. We use only high-quality raw materials with the necessary certifications in the production process. To ensure the highest quality of our services and products, we conduct tests and inspections at every stage of production. Tablets can also be coated with a protective layer that shields the dietary supplement from external conditions such as moisture, light, and air. This also enhances the consumer experience, positively affecting the taste and smell of the product.

# Private Label

---

Do you want to have your own brand of dietary supplements but don't have a large budget for production? With **Medica-Group's Private Label** offer, it's possible. Take your first steps with us and order products under your brand now!

The Private Label option allows you to expand your range with your own brand, attracting loyal customers and increasing revenue. You don't need specialized knowledge about supplement production because you have access to our experts, who not only possess extensive knowledge but are also up-to-date with new legal regulations.

## WHY IS IT WORTH IT?

- Low initial costs
- Fast time to market
- Production flexibility
- High quality
- Building customer loyalty
- Safe and low risk

# Additional Services

Would you like to establish your own brand but are unsure about preparing the composition, registering the supplement, and handling other intricate legal matters? Benefit from the expertise of the Medica-Group team, who will offer you full support from start to finish!

## **Composition development**

Share your product assumptions with us, and we will craft its ultimate composition.

## **Supplement Registration in GIS**

Assistance in product registration for market approval in Poland. A specialized service for chain store sales to allocate a barcode.

## **Product label content development**

The labeling of a dietary supplement must include up-to-date information in compliance with regulations on dietary supplements and cosmetics. We can assist you in developing it to fulfill these criteria!

# Additional Services

---

## **Creation of product marketing materials aligned with the brand messaging.**

A service involving the development of marketing studies for product descriptions in compliance with regulations on dietary supplements and cosmetics.

## **Product graphic design**

Support is provided by our marketing and creative department, which will develop comprehensive solutions for you, including:

- Label and cardboard design
- Websites
- Promotional materials
- Other essential components for successful brand promotion

## **Research on product effectiveness**

Product effectiveness tests are conducted and validated through trials on a group of subjects.
